## Female Package

### Lab Tests:

Renal Profile and Urine Analysis

**Imaging Tests:** Ultrasound (Kidneys, Ureters, and Bladder) and Post-Void Residual Scan

**Specialist Consultation**  
by Urologist

**Price: RM450**

## Why Perform Urology Screening?

Prostate cancer is the 3rd most common cancer among men in Malaysia

Many kidney, bladder, and prostate conditions can develop without obvious symptoms in their early stages

Around 50% of men may develop an enlarged prostate by the age of 60
